STATE OF ILLINOIS

KWAME RAOUL
ATTORNEY GENERAL

February 8, 2023

Dear Friend:

Survivors of rape, molestation and other forms of sexual assault rely on you as a medical provider to treat their physical wounds, provide them with justice and help them endure severe emotional trauma while beginning the difficult recovery process.

In the criminal justice system, we rely on those who first treat victims of sexual assault to collect the evidence used to identify, prosecute and convict the assailants – crucial steps to providing some sense of peace and security in the victims' otherwise shattered lives. No matter what role you play in this critical process, your invaluable work places you on the frontline in the fight against sex crimes and makes you one of the most important people in victims' lives.

I would like to invite you to attend a training designed to improve our response to sexual assault patients: the Pediatric/Adolescent Sexual Assault Nurse Examiner Training.

The **Pediatric/Adolescent Sexual Assault Nurse Examiner Training** is an important 40-hour training designed to educate registered nurses, advanced practice providers and physicians performing sexual assault medical forensic examinations. The training is comprised of a combination of pre-coursework and live training in Urbana. Instructions regarding the pre-coursework will be released on March 30, 2023, and students must complete the pre-coursework by Thursday, April 27, 2023. The SANE training will be held **May 3-5, 2023**, from 8:00 a.m. – 5:30 p.m. at Carle Foundation Hospital in Urbana.

This training is for registered nurses, advanced practice providers and physicians. Applicants must have a license in good standing, have a minimum of one year of clinical experience, acknowledge the requirements of the training including submitting a recent resume, complete the pre-coursework prior to the date listed above and have an identified mentor (must be a Child Abuse Pediatrician, SANE-P or PA SAFE) who has received specialized training in the care of both acute and non-acute sexual assault patients and is performing those exams on a routine basis.
